

INCIDENT MANAGEMENT SITUATION REPORT  
THURSDAY, MAY 18, 2000 - 0530 MDT  
NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

New large fires were reported in the Southwest and Southern Areas. Crews on the large fires in the Southwest made good progress yesterday in spite of continued high winds. Containment objectives were reached on large fires in Texas, Arizona, North Carolina, Virginia, and Alabama. The National Interagency Coordination Center processed orders for helicopters, an air tanker, engines, radio equipment, and miscellaneous overhead. A Buying Team was mobilized to the Southwest Area. Very high to extreme fire indices were reported in New Mexico, Arizona, Utah, California, Texas, Oklahoma, and Maryland.

On 5/13, Interior Secretary Bruce Babbitt and Agriculture Secretary Dan Glickman announced a 30-day suspension of all federal prescribed fires west of the 100th meridian. For more information, see the U.S. Forest Service Fire web page at [www.fs.fed.us/fire/news.shtml](http://www.fs.fed.us/fire/news.shtml).

SOUTHWEST AREA LARGE FIRES:

CERRO GRANDE, Bandelier National Monument. An Area Command Team (Meuchel) and two Type I Incident Management Teams (Humphrey and Gage) are assigned. The fire is burning near Los Alamos, NM. High winds continued yesterday, but was not a major factor in the fire's spread. No significant fire activity has been observed on the perimeter. Patrol, mop-up and rehabilitation operations are underway on the south side of the fire.

SCOTT ABLE, Lincoln National Forest. The fire is located 20 miles south of Cloudcroft, NM. A Type I Incident Management Team (Studebaker) is assigned. Sustained winds of 30 to 40 mph with higher gusts caused fire activity to increase inside the perimeter. Control problems include spotting in two of the divisions.

OUTLET, Grand Canyon National Park. A Type I Incident Management Team (Frye) is assigned. The fire is burning in designated and proposed wilderness 25 miles south of Jacob Lake, AZ. Cooler weather and higher humidities have reduced fire activity. Significant line construction is being accomplished on the north flank of the fire. Crews have begun to mop up the western third of the fire perimeter.

HAYMEADOW, Las Cruces Field Office, BLM. The fire is burning in light fuels 30 miles south of Alamogordo, NM. High winds caused the fire to spread quickly, but no resources are threatened. The fire was started by a missile on the White Sands Missile Range.

VINEYARD, Capitan District, New Mexico State Forestry. This fire is burning nine miles east of Roswell, NM in grass and brush. High winds caused the fire to spot across the Pecos River, creating some access problems. A mobile home, a travel trailer and a vehicle were destroyed.

SOUTHERN AREA LARGE FIRES:

LONG BAY, National Forests of Florida. A Type II Incident Management Team (Wilkins) is assigned. The fire is in the Apalachicola National Forest, 40 miles southwest of Tallahassee, FL. Burnout operations are underway. Current threats are to endangered species and timber resources.

FLOWERS, Florida State Division of Forestry. The fire is ten miles northwest of Port Charlotte, FL. Smoke from the fire caused Interstate 75 to be closed intermittently during the day yesterday. Six local structural fire departments are assisting with suppression efforts.

CANEY BOTTOM, National Forests in North Carolina. This fire, which began on 5/9, is 22 miles northwest of Burnsville, NC. It grew considerably on 5/16 due to extremely dry conditions and winds. A burnout operation is planned for today.

OUTLOOK:

\*\*\* A FIRE WEATHER WATCH IS POSTED IN NORTHEAST AND CENTRAL FLORIDA FOR LOW RELATIVE HUMIDITIES \*\*\*

Florida will be partly cloudy with east to south winds at 5 to 15 mph. High temperatures will be in the mid 80's to lower 90's. Afternoon relative humidities will be 35 to 45 percent.

New Mexico will be partly cloudy with a slight chance of showers in the north. In the western part of the state, winds will be southwest to west at 10 to 20 mph. Winds in the east will be north to northeast at 10 to 25 mph. High temperatures will range from the mid 50's in the northeast mountains to the mid 90's in the southern deserts. Minimum relative humidities will be 10 to 20 percent.

Arizona will be sunny and warmer. Afternoon winds will be north to northwest at 10 to 20 mph. Temperatures will be in the high 60's in the northern mountains and in the mid 90's in the southern lowlands. Minimum relative humidities will be 10 to 20 percent.

West Texas will be partly cloudy in the north and mostly sunny in the southern part of the state. Winds will be southwest to west at 15 to 25 mph. High temperatures will range from the 70's in the north to near 105 along the Rio Grande. Minimum relative humidities will be 10 to 20 percent.

North and South Carolina will be partly cloudy with a few morning showers or thunderstorms in the northeast. High temperatures will be from the mid 70's to near 90. Winds will be southwest at 10 to 20 mph.

Virginia will be partly cloudy with southwest winds of 15 to 25 mph. Maximum temperatures will be in the 80's.
